

SANNI YUSUF

AI/ML Enthusiast

ysanni560@gmail.com | +234-703-063-2208 | github.com/s4nniyusuf | x.com/s4nni_yusuf

SUMMARY

Statistics student at the University of Lagos with a strong focus on Machine Learning and AI Engineering. Experienced in building and deploying end-to-end ML systems involving web scraping, NLP, and API-based inference. Interested in applied AI systems and production-ready ML solutions.

EDUCATION

B.Sc. Statistics, University of Lagos

Expected [2028]

CGPA: **4.77** / 5.00

Relevant Coursework: **Statistical Modeling, Data Analysis, Linear Algebra, Probability Theory**

TECHNICAL SKILLS

Languages	Python
Web-Scraping	BeautifulSoup, Playwright
Data & Visualization	NumPy, Pandas, Matplotlib, Seaborn
ML/NLP	NLTK, spaCy, Scikit-learn, PyTorch
Backend / Deployment	Streamlit, Gradio, FastAPI, Docker
Tools	Jupyter Notebook, VS Code, Google Colab

PROJECTS

ClaimCheck [<https://github.com/s4nniyusuf/ClaimCheck>]

Summary: An AI tool that verifies e-commerce product claims on Jumia by benchmarking seller descriptions against customer reviews to detect inconsistencies and misleading information.

Tech Used: Python | Playwright | BeautifulSoup | spaCy | Groq Llama API | Streamlit

9JaBallGist [<https://github.com/s4nniyusuf/9JaBallGist>]

Summary: Automated Twitter bot that scrapes football news from BBC&ESPN RSS feeds, rewrites content in authentic Naija Pidgin using an LLM, and publishes 10+ tweets daily.

Tech Used: GitHub Actions | BeautifulSoup | Pillow | Groq Llama API | Twitter API

Personality Type Detector [<https://github.com/s4nniyusuf/Personality-Type-Detector>]

Summary: End-to-end ML system that predicts personality types from 29 behavioral features. Includes pre-processing, model training, FastAPI inference API, Streamlit UI, and Dockerized deployment on Railway. Achieved 99.85% accuracy and F1-score (SVM) on 20,000+ sample

Tech Used: Python | Scikit-learn | FastAPI | Streamlit | Docker | Railway
